Software Engineering graduate with enterprise co-op experience developing, testing, and optimizing production-grade applications. Highly proficient in Python, Java, C#, JavaScript, and SQL. Proven track record of executing deep root-cause analysis, building robust database schemas, and managing technical workflows in Agile environments.

CORE TECHNICAL SKILLS

Languages: Python, Java, C#, JavaScript (ES6+), TypeScript, SQL, PowerShell.

Web Frameworks & Libraries: Node.js, React.js, Express, Tailwind CSS, Bootstrap, HTML5, CSS3.

AI & Intelligent Systems: Machine Learning Concepts, Neural Networks (PyTorch, Scikit-learn), Prompt Engineering, Vector Databases.

Tools, Platforms & Infrastructure: Git, GitHub, Docker, Azure AI Foundry, Visual Studio, Visual Studio Code, Eclipse.

Methodologies & Competencies: Software Development Life Cycle (SDLC), Software Quality Assurance (QA), Unit Testing & Debugging, Root-Cause Analysis, Agile (Scrum/XP), Systems Analysis, Technical Documentation.

PROFESSIONAL EXPERIENCE

Software Developer (Intern)

Siemens, Montreal

May 2022 – December 2022

- Developed and verified specialized software utilities and automated test infrastructure using Python, C#, and PowerShell.
- Diagnosed, debugged, and resolved production defects using deep root-cause analysis to minimize system debugging cycles.
- Partnered closely with senior developers, system validators, and cross-functional IT teams across all phases of the SDLC.
- Utilized Git version control systems and structured Agile task boards to systematically coordinate daily deliverables.

Operations Manager

Tahini's, Ottawa, ON

March 2026 – Present

- Lead, onboard, and train junior team members, systematically resolving daily operational blockers and defining execution standards.
- Apply continuous improvement and resource allocation principles to optimize team workflows and ensure quality control.

PROJECTS

TrackMyDegree (Winner of Instructional Technology Award)

Concordia University

- Architected a data-driven degree-tracking web application utilizing React.js, Node.js, and TypeScript.
- Compiled and optimized a robust SQL relational database layer to accurately process complex academic prerequisite schemas.
- Leveraged modern AI coding tools and prompt engineering to rapidly prototype UI components and accelerate development velocity.

SmartClass A.I. Assistant

Concordia University

- Constructed an advanced data classification neural network system utilizing Python and PyTorch architectures.
- Deployed automated debugging scripts and hyper-parameter tuning to optimize system precision to an 85% accuracy threshold.

EDUCATION

Bachelor of Engineering – Software Engineering | Concordia University

Graduated: Winter 2025

Certifications: Python (Advanced) & Java (OOP) – HackerRank | JavaScript Fundamentals V2.0 – Skivvy
